

WATER BASED SEALER &
CURING MEMBRANE

S o 2 - A A o 5 2

The Water Based Sealer & Curing Membrane is 100% acrylic, with a solid content of 25%; it's eco-friendly & produced under the most strict quality standards.

It offers excellent curing, seal & protection from dust to fresh concrete. It's a product developed for interior & exterior use, as well as for horizontal and vertical surfaces.

It has excellent abrasion resistance and to many chemical substances, it seals superficial pores and when dry, it produces a transparent, high durability film that does not turn yellow with time nor does dust adhere to it.
