

ELASTOMERIC ACRYLIC
WATER-REPELLENT SEALER

E01-AA066

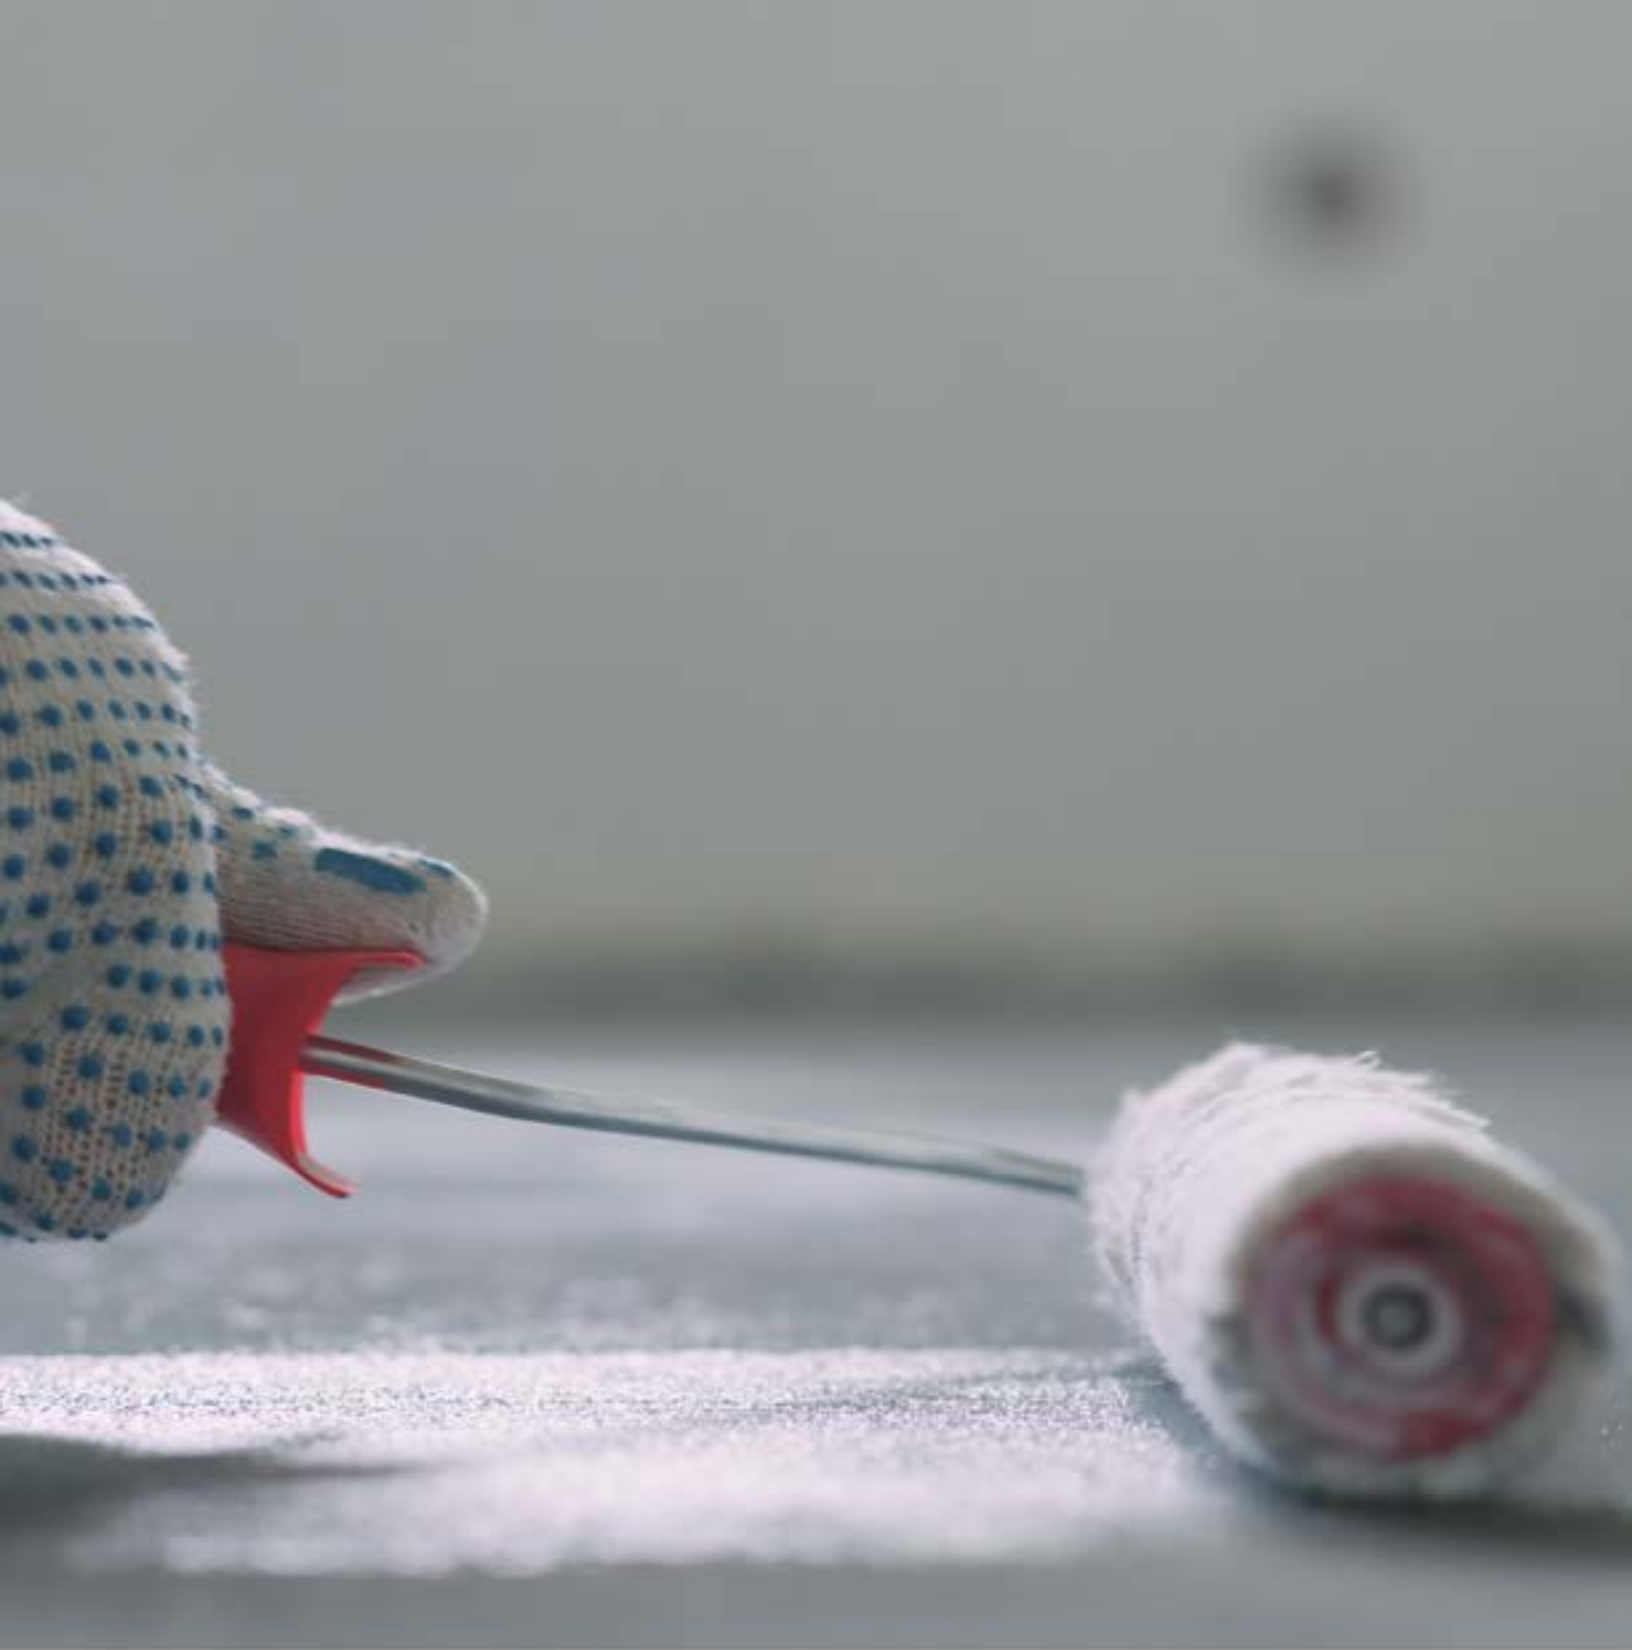

The E01-AA066 Elastomeric Acrylic Water-Repellent Sealer is a solvent free and eco-friendly product. It was developed to seal horizontal and vertical surfaces, as well as prefabricated pieces.

It has high elasticity qualities, adheres itself strongly to cement or clay surfaces and avoids fluorescence (saltpeter) by protecting the superficial layer and increasing the sealers life.

It penetrates the surfaces pores in addition to providing water-repellent qualities.
