

WATER REPELLENT  
SEALER

Ro1-AA005

The Water Repellent and Curing Membrane R01-AA005 is a liquid, transparent, solvent free and eco-friendly water repellent.

It was developed to create a barrier to the passage of liquid water in cement based walls or prefabricated pieces, as well as on stones, quarry stone, among others. All of these installed vertically.

It develops repellence to liquid water absorption without sealing surface pores, it also prevents saltpeter apparition. It diminishes water based painting consumption and prolongues their life.

In its application over frech concrete or mortars, it acts as a curing membrane. It is higly resistant to sunlight, outdoor contidions and alkalinity, ensuring its permanence over time.
